Brief Biography

I am a health data scientist with a background in pharmacy, bringing a unique combination of domain knowledge and analytical expertise to complex health data projects.

I am highly disciplined, detail-oriented, and driven by a strong passion for reproducible research, statistical analysis, and data visualization.

I am proficient in statistical software such as R and SAS, with extensive experience in data cleaning, analysis, visualization, and statistical modelling.

Over the years, I have worked extensively with large, linked health administrative datasets, gaining expertise in platforms such as SURE, PLIDA, and NHDH. My experience spans nationwide datasets, including hospital admissions, emergency department records, Pharmaceutical Benefits Scheme (PBS) and Medicare Benefits Schedule (MBS) claims, and death registrations.

In addition, I have worked with NSW state-level data collections, covering perinatal records, birth registrations, child protection reports, public housing, NAPLAN, school enrollment, the Australian Early Development Census, out-of-home care, and justice system data.

I am deeply committed to continuous learning and professional development, always eager to explore new packages, techniques, or skills that enhance my ability to analyze data effectively and deliver meaningful insights.

Professional Interests

Reproducible Research · Data Visualization · Statistical Modeling

Skills

Big Data Research · R · SAS

Education

Sept 2021 – Mar 2023 The University of New South Wales M.S. Health Data Science
WAM: 88% (Dissertation: 91%)

Dissertation: Changes in atherosclerotic cardiovascular disease risk over time among people living with HIV

Mar 2015 – Mar 2019 The University of Sydney B.S. Pharmacy

Employment History

Research-focused Positions

July 2023 – Present Data Scientist, Sydney Pharmacy School, The University of Sydney, Sydney, NSW

Key Project:

- Mapping multimorbidity disease clusters in older Australians using nationwide linked health administrative datasets.
- Built a nationwide dementia cohort linking nationwide hospital admissions, ED presentations, PBS, aged care, and death registration data.

Key Responsibilities:

- Critically reviewed literature and drafted analysis plans.
- Prepared analysis-ready datasets using SAS from nationwide large linked health administrative datasets, including hospital admissions, ED presentations, PBS, aged care, and death registration data.
- Make data visualizations to guide analysis and perform network clustering (using the igraph package in R) for clustering analysis.
- Drafted manuscript, abstract, and prepared slides for conference presentation.
- Maintained regular communication with project investigators, and implemented feedback in a timely manner.

July 2023 – Mar 2025 Data Scientist, School of Population Health, The University of New South Wales, Sydney, NSW

Key Project:

- 1) Aboriginal Community Controlled Ear Health Support System (ACCESS).
- 2) Evaluation of Sustaining NSW Families (NSW Health).
- 3) Assisted in building the NSW Child E-Cohort Project Data Platform (Linkage 2), linking the below datasets:

- Perinatal Data Collection
- Birth Registrations
- Hospital Separations
- Emergency Department Presentations
- Australian Early Development Census
- Public School Enrolments
- NAPLAN
- Child Protection Reports
- Out-of-Home Care Placements
- Justice Data (Youth and Adult Corrections)
- Public Housing Data
- Death Registrations / Cause of Death

Key Responsibilities:

- Critically reviewing the literature on epidemiological and statistical methods to inform the development of analysis plans.
- Drafting data management and data analysis plans, with input from the research team.

- Implementing the data management plan to prepare analysis-ready datasets from linked datasets, including data cleaning and manipulation, using SAS.
- Performing data visualization and executing logistic regression and inverse probability of treatment weighting (IPTW), using R.
- Drafting scientific papers, protocols, and conference abstracts.
- Contributing to the project management of research projects to the highest scientific and ethical standards.
- Drafting applications and contributing to ongoing reporting to the relevant ethics committees and data custodians for research projects.
- Maintaining regular communication with project investigators and Aboriginal community organizations to ensure the program is delivered in a culturally appropriate manner.

Feb 2023 – Dec 2023 Data Scientist / Research Officer, School of Pharmacy, The University of Sydney, Sydney, NSW (FTE 0.4)

Key Project:

- Multi-Agency Data Integration Project (MADIP):
- Investigated high-risk prescribing in older adults using linked PBS and Census data.

Key Responsibilities:

- Critically reviewed existing literature and drafted research protocol and data management plan.
- Prepared analysis-ready datasets using SAS.
- Conducted logistic regression and developed models.
- Contributed to publications, abstracts, and reproducible documentation.

Clinical-focused Positions

Mar 2021 – Dec 2023	Pharmacist in Charge (FTE 0.2), Bondi Junction Pharmacy, Sydney, NSW
Mar 2021 – Dec 2023	Pharmacist on Duty (FTE 0.4), Blooms the Chemist, Bondi Junction, Sydney, NSW
Mar 2020 – Sept 2020	Registered Pharmacist, Chemist Warehouse, Double Bay, Sydney, NSW
Dec 2018 – Mar 2020	Graduate Intern Pharmacist, Chemist Warehouse, Randwick, Sydney, NSW

Key Responsibilities:

- Dispensed medications using pharmacy software while reviewing histories for safe and effective drug use.
- Counseled patients on prescriptions, OTC medications, and medical devices.
- Supervised and mentored pharmacy students and technicians.
- Prepared blister packs for elderly patients to optimize adherence.
- Performed blood pressure tests, provided hypertension counseling, and referred patients as needed.

- Collaborated with healthcare professionals to optimize patient outcomes.
- Reported adverse drug events (ADEs) and medication errors per regulatory guidelines.

Research Interests

I am interested in pharmacoepidemiology and expanding my knowledge of statistical and analytical methods using large, linked health administrative datasets.
