Brief Biography

I hold a Bachelor of Pharmacy from the University of Sydney and a Master of Health Data Science from UNSW. I have over three years of research experience in epidemiology, population health and applied science.

Over the years, I have worked extensively with large, linked administrative health datasets, developing strong expertise in data integration, statistical modelling and population-level analysis. I have experience working with the SURE, PLIDA, and NHDH data platforms and am proficient in statistical software, particularly SAS and R.

Technical Skills & Expertise

SAS · R · R Shiny · GitHub

Big Data Management · Reproducible Research · Data Visualization · Statistical Modelling · Data Storytelling

Education

Sept 2021 - May 2023 **The University of New South Wales** **M.S. Health Data Science**
WAM: 88% (Dissertation: 91%)

Dissertation: Changes in atherosclerotic cardiovascular disease risk over time among people living with HIV

Mar 2015 - Mar 2019 **The University of Sydney** **B.S. Pharmacy**

Employment History

Research-focused Positions

Mar 2026 - Present **Research Officer, NeuRA, UNSW**

- Led one systematic review and contributed to some systematic reviews investigating sex differences in dementia risk factors.
- Lead analyst for a population-based longitudinal cohort study using data from the PATH Through Life Study.
- Contributed to the international CARE project conducting sex-specific prevalence analyses of dementia risk factors to inform population-attributable risk estimations.

Mar 2023 - Dec 2023; April 2025 - Mar 2026 **Data Scientist, Sydney Pharmacy School, USYD**

- Lead analyst and first author of a nationwide cross-sectional data linkage study examining sex-specific multimorbidity patterns among Australians aged 65 years and older.
- Lead analyst for a Multi-Agency Data Integration Project (MADIP) examining high-risk prescribing patterns among older Australians, including those living with dementia, using linked PBS and Census data.
- Lead analyst in the development of a national dementia cohort integrating linked hospital admissions, emergency department presentations, PBS, MBS, aged care, and mortality data.

Jul 2023 – Mar 2025 **Data Scientist, School of Population Health, UNSW**

- Lead analyst for the Aboriginal Community Controlled Ear Health Support System (ACCESS) project, examining temporal trends in ear-related procedures among Aboriginal children.
- Lead analyst for the evaluation of the Sustaining NSW Families program, assessing program outcomes using population health data.
- Contributed to the development of a large-scale linked data platform integrating multiple administrative datasets for the NSW Child E-Cohort Project.

Clinical Experience

Nov 2018 – Jul 2025 **Registered Pharmacist, Community Pharmacy**

Research Interests

My research interests involve in pharmacoepidemiology and ageing, with a particular focus on developing and applying advanced statistical and analytical methods to large-scale linked health administrative data.
